### LRD-0462 Collimated Diode Laser System

#### Series Specifications:

Nominal Wavelength	462 nm
Output Type	CW
Laser Source Type	Diode

#### Overview:

The LRD-0462 Series of Collimated Diode (Semiconductor) Lasers are ideal for applications requiring a short wavelength of 462 nm and output power levels of 5 mW to 2500 mW with a high level of long-term output power stability and long operating lifetime at a very competitive cost.

These lasers are commonly used for various scientific applications involving fluorescence excitation, as well as PIV, spectral analysis, and a broad spectrum of other applications. The driver is available as a complete FDA-compliant system or as an O.E.M. component with significantly reduced dimensions.

Available with both on-board and remote on/off control as well as a wide array of output power and stability levels, Laserglow products are currently being used by some of the World's top universities and other prominent research facilities.
