LRS-0721 DPSS Laser System

Series Specifications:

Nominal Wavelength	721 nm
Output Type	CW
Laser Source Type	DPSS

Overview:

The LRS-0721 Series of Diode-Pumped Solid-State (DPSS) Lasers are ideal for applications requiring 5 mW to >100 mW of 721 nm laser light with a high level of long-term output power stability and long operating lifetime at an aggressively competitive cost.

These lasers are commonly used for various scientific applications such as measurement, spectral analysis, and a broad spectrum of other applications. The driver is available as a complete FDA-compliant system or as an O.E.M. component with significantly reduced dimensions.

Available with both on-board and remote on/off control as well as a wide array of output power and stability levels, Laserglow products are currently being used by some of the World's top universities and other prominent research facilities.

Key Features:
